

Jed Gabriel Seno

COBOL DEVELOPER · AI ENGINEER · PEOPLE MANAGER

Philippines · [linkedin.com/in/jed-gabriel-seno](https://www.linkedin.com/in/jed-gabriel-seno)

SUMMARY

Engineering leader with 9 years spanning COBOL mainframe development and people management, now driving AI adoption — agentic coding, multi-agent orchestration, and workflow automation.

EXPERIENCE

DXC AI Champion

March 2026 — Present

DXC Technology — Insurance Philippines Software

- Built and shipped multiple MVPs via AI-assisted coding using Claude Code, GitHub Copilot, OpenAI Codex, and Google Antigravity, cutting prototype turnaround time significantly versus traditional development.
- Directed multiple Claude agents to build and host a full-stack web application on GCP, distributing tasks across agents to manage context window usage and cost.
- Designed and deployed workflow automations in N8N integrating MCPs across Google, ElevenLabs, Firecrawl, and other APIs.
- Orchestrated a multi-agent pipeline for CRM (Pipedrive) automation, covering prospect sourcing through meeting scheduling and deal creation.
- Hosted a live AI demo for the Insurance Philippines team, presenting to roughly 70 onsite and online attendees.

Associate Manager

July 2025 — Present

DXC Technology — Insurance Philippines Software

- People manager and member of the DXC Insurance Software Philippines leadership team; lead the Insurance Engagement Committee, planning town halls, client visits, and team-building events.
- Managed team performance, resulting in 5 promotions and 7 salary increases, and helped grow organizational headcount by 6 FTE.

Senior COBOL Mainframe Developer

August 2022 — Present

DXC Technology — Insurance Client

- Senior COBOL mainframe developer for a major American insurance client, covering new product development, enhancements, and production support.
- Resolved 10–15 bugs in Riders functionality affecting withdrawal processing for 200–300 insurance policies.
- Lead developer for a new regulatory product change and for a CICS field update impacting roughly 200–300 programs and 600–700 transactions.
- Lead contributor to AI-mainframe innovation projects, including a Copybook-to-CSV agent and a mainframe PDS/dataset explorer extension for VS Code.

IT Analyst

June 2021 — August 2022

Tata Consultancy Services — Financial Services Client

- Developed automated solutions that minimized production support toil, saving an average of 60–80 incident tickets and 40 hours weekly.
- Analyzed and resolved high-priority job abends, including effort estimation and downstream impact assessment.
- Trained new SRE team members, improving onboarding processes.

Senior Software Engineer

November 2016 — June 2021

Accenture — Utilities, Hospitality Clients

- Delivered production support and technical development, consistently meeting SLAs on job abend resolution.
- Proposed and implemented solutions with downstream impact analysis and thorough testing.
- Built automated JCL tools using Easytrieve, REXX, and DFSORT.

SKILLS

AI Development: Anthropic Claude Code, GitHub Copilot, OpenAI Codex, Google Gemini

AI Orchestration: N8N, MCP, Multi-Agent Systems, ElevenLabs

Languages: COBOL, JCL, DB2, CICS, VSAM, Natural, Adabas, REXX, Easytrieve

Mainframe Tools: Endevor, File-Aid, SPUFI, TSO, Expediter, Abend-AID, Control-M, ISPW, XPTR

Platforms: Microsoft Azure DevOps, ServiceNow, Microsoft Office

Management: People management, Talent acquisition, Team engagement leadership

CERTIFICATIONS

- Professional Scrum Master (2023)
- AWS Certified Cloud Practitioner
- Google Project Management Certificate
- LOMA 281 — Meeting Customer Needs With Insurance and Annuities
- DXC Leadership Edge — 4-day leadership workshop

EDUCATION

BS Computer Engineering — Lyceum of the Philippines University, June 2011 — March 2016
